The Daily Intelligencer is delivered by Carriers in Wheeling and adjacent towns at 15 cents per week.

(Entered at the Postoffice at Wheeling, W. Va., as second-class matter.)

WHEELING, MAY 30, 1889.

PERSONS going out of town for the summer can have the DAILY INTELLIGENCER mailed to them for 50 cents per month. The address of the paper will be changed as often as desired.

Put out your flag in honor of the day.

We have once more almost enough swallows to make a summer.

If the Clan-Na-Gael murdered Cronin, then the Clan-Na-Gael is ready for its autopsy.

It costs something to keep a city clean, and something not to keep it clean. Which is cheaper in the long run?

Next time President Harrison goes to sea he must not go in a yacht. He must go in a sieve. That will please the hostiles.

GABRIEL, garbage, everywhere, and the thermometer getting ready for the summer campaign! What are the help-les to do unless the city comes to their relief?

After the intersection of Market and Fourteenth street is well paved, it is found necessary to tear it up to get drainage. The two things come together within a week. No comment could add to this simple statement of a striking fact.

Is the new bridge across the Ohio at this point to be built, it will be largely by outside capital. At the same time Wheeling capital goes West in search of investment. Have outsiders a keener appreciation of Wheeling's productive power than Wheeling people themselves?

**The Union Dead.**  
Decorations Day belongs to the Grand Army of the Republic, men who fought for the Union cause, to the living and the dead. They made it and it is theirs of right. It is for them to say how the day shall be observed, and for the rest of us to fall in with their arrangements. This ready acquiescence in the plans of the old soldiers shames nobody out from a cordial co-operation with them in all they may devise to honor the memory of their dead comrades and to keep alive the memory of the patriotic sacrifices and valor which every soldier's grave commemorates with silent eloquence.

These dead of the Union cause need nothing from the hands or the lips of the living. Their deeds and the spirit which impelled them speak for themselves. The living are most benefited by these patriotic acts of veneration—the comrades who survive and those who have come later on the stage to enjoy the fruits of the National triumph.

There can be no sectional bitterness in these Decoration Day observances, for they commemorate an effort, a sacrifice and a triumph for the Union of all the people of all the States.

**Jeans' Yellowplush Squint.**  
When the INTELLIGENCER draws the "deadly parallel" on the Register to prove that it is at its old trick of stealing and using original editorial productions of other newspapers, the Register replies that the INTELLIGENCER steals its editorials from the Philadelphia Press. This is a poor apology to the Register's readers, who are persistently made the victims of a gross cheap John (or is it Cheap Jeans?) deception.

After the Register squares the account with its readers it may find time to prove its accusation that the INTELLIGENCER is guilty of the same offense. We shall not confine the proof to articles stolen from the editorial columns of the Philadelphia Press—the Register may have the whole field of publications to browse in.

When the present editor of the INTELLIGENCER was writing for the editorial page of the same Philadelphia Press more talent was required of the office boy than has yet been shown by the General Manager of the Register. The office boy was expected to sweep out in tress, clean, good English, with an occasional dash of original brilliancy. Your squinting is grotesque, but it won't do, Jeems Yellowplush! "The way of the transgressor is hard."

**Wire vs. Cut Nails.**  
The wire nail is about the only thing in the nail line that has been yielding any profit to manufacturers of nails the past year or two. It would be hard to find any more unprofitable stock than that invested in nail mills. Pittsburgh cut nail mills have been for a year or two practically idle, and those of Wheeling, Bellaire and Ironport might as well have been idle for all the good they are doing for stockholders. It is doubtful if any nail mill in the Ohio Valley can be run without loss to the owners. Mills which paid stockholders regularly 10 to 20 per cent a decade or two ago, are now running at a loss. There is nothing in the nail line remunerative to the manufacturer at this date outside of the wire nail.—Pittsburgh Dispatch.

Our Pittsburgh contemporary can afford to discuss the present lamentable condition of the nail trade with comparative indifference. Pittsburgh really ceased to have an interest of any importance in nails many years ago, and each year her interest has been getting not only relatively but absolutely less. She has been getting out of nails year by year, and is now almost wholly out. She has substituted other branches of trade that promise better and more permanent results. Hence the fact that the wire nail has virtually done the cut nail in the market is keeping nobody awake at nights at Pittsburgh.

Not so, however, at nail points all along the Ohio Valley below Pittsburgh, where the prosperity of the business is a matter of so much concern, both as regards investment and employment. Those who have their means at risk and those who have their employment at risk have both, indeed, a vital concern in the present almost played out condition of the cut nail trade. The only

wonder is that so much patience has been exercised by these two classes in the face of so much palpably and acknowledged mismanagement of the business.

The reason of the growing popularity of the wire nail has not been a secret. On the contrary, everybody has known that the explanation consisted largely in the fact that those who made them gave the consumers of nails from one-third to one-half more nails to the pound. Was this fact not something of great importance to cut nail manufacturers? Should it not have been recognized as this?

The fact that it has not been recognized would seem to indicate to the public one of two things, either that cut nails cannot compete in this respect with wire nails, or else that the makers of them find it more profitable to go on selling the old fashioned heavy nails. That they have not found it profitable to do so needs no proof at our hands. The declining price for nail stocks tells the story of itself.

If then the cut nail could have been kept more popular with the public than it is to-day, but has not been so kept, it is plain that those who have been in charge of the vast interest embraced in their production are justly responsible to their stockholders for the present state of affairs.

The question arises as to what point the losing business of the past five years is going to be carried before stockholders will come to the front and take charge of their interests. Will it be when the stock of the majority of the mills quotes at fifty cents on the dollar? Some of them are nearing that point now. Or will a halt be called at the instance of those who have so much at stake and who recognize a necessity for two essential changes—viz:—first to check the over-production of a nail that does not meet the competition of the wire nail, and, next, to make a nail that promises to meet that competition with at least a greater degree of success than the present article.

#### LECTURE AT BETHANY.

Col. Alex Campbell talks instructively and entertainingly at Bethany.

On Tuesday evening the old historic church at Bethany was filled to overflowing with an audience assembled to listen to a lecture from Col. Alex Campbell upon the history, industries, manners and customs of Australia. A member of the United States Commission to the recent International Exhibition at Melbourne, and chairman of the United States delegation to the same, he is a responsible member of the industries of that country, every department was courteously and eagerly opened to his inspection. He traveled the length and breadth of the land, and his quick intelligence took in with comparative ease all that is of interest to the utilitarian and the curious. It was pleasant to hear Col. Campbell's voice in the house whose echoes had so often answered to that of his illustrious father, and that the great memories as the place always awakens was not without its potent influence upon the speaker was evident in the touch of emotion under which he began his address.

The fluency, the animation, the directness of the lecturer's style are familiar to all whose privilege it is to know him as a conversationalist, and the audience listened with such close attention that an occasional burst of laughter at some humorous touch upon a national peculiarity was hushed almost as soon as begun, for fear that something following might escape the ear.

As the assembly dispersed expressions of pleasure at what they had heard were mingled with regrets that the lecture had been so short. The speaker insisted that he had spoken for an hour, but it was only upon recalling how much and how varied had been the information received, that one could realize the fact. This lecture was prepared at the urgent solicitation of Colonel Campbell's friends, and it is certain that wherever he is heard it will meet with a most gratifying appreciation.

**Notes from the Court House.**  
Clerk Hook yesterday admitted to record three deeds of trust and the following transfers of real estate:

For \$800, by J. C. Pierce to Charles Reitz, for \$800, lot 11 in square 20 in Joseph Caldwell's addition.

May, by D. Lamb and H. M. Russell, special commissioners, to H. C. Caldwell, for \$500, for the same lot above named.

The argument in the John Reed case was partly finished in Part I of the Circuit Court yesterday. In Part II the Pipe-McCoy slander suit occupied the court. Dr. Pipes was recalled by the plaintiff in rebuttal, and gave his own version of the occurrences out of which the suit grew and of the circumstances which have figured in the evidence. The evidence on both sides was finished last evening, and court adjourned till Friday morning, when the argument will begin. Each side is limited to five hours.

The Board of County Commissioners met yesterday and sat as committees, auditing the monthly bills and accounts. There was nothing out of the routine.

**\$100 Reward.**  
The readers of the INTELLIGENCER will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength, by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. F. J. CHERRY, Toledo, O. Sold by Druggists, 75c.

**I AM HAPPY!**  
The surest sign of health is a happy countenance. The surest sign of health is a happy countenance. The surest sign of health is a happy countenance.

**WATERPROOF BOOTS.**  
WOLF & RANDOLPH, PHILADELPHIA.

**WOLF & RANDOLPH, PHILADELPHIA.**

**NEW CORPORATIONS.**  
Charters issued lately by the Secretary of State.

A certificate of incorporation has been issued to the Hurricane Oil and Gas Company, organized for the purpose of boring for natural gas and petroleum, manufacturing or preparing the same for market, and transporting the same by pipe lines or otherwise. The principal office is to be at Winfield, Putnam county, and the charter is to expire on May 15, 1890. The capital stock is \$50,000, ten per cent of which has been paid in, with the privilege of increasing the same to \$50,000 in all. The stock is divided into shares of \$100 each, of which Frederick P. Hayes and John S. Davis, of Philadelphia, and Michael Murphy, of Chester county, Pa., hold 125 shares each, and George H. Torrey and Frank H. Taylor, of Old City, Pa., hold respectively sixty-three and sixty-two.

The Spring Manufacturing Company, of Martinsburg, has also been chartered. It is organized for the purpose of manufacturing wagons and agricultural implements, and its principal office is to be at Martinsburg, this State. The charter is to expire June 1st, 1910. The sum of \$150 has been subscribed to the capital stock, ten per cent of which has been paid in, with the privilege of increasing the same to \$100,000. It is divided into shares of \$25, of which E. Boyd Faulkner, D. W. Shaffer, L. M. Bender, H. F. Ashway and Blackburn Hughes, of Martinsburg, and Henry J. Seibert, of Berkeley county, hold one each.

**Climate for Consumptives.**  
The several climates of Florida, Colorado and California have each been much prescribed for sufferers from lung disease, yet thousands of the natives in those states die of the fatal malady. A far more reliable remedy is to be had in every drug store in the land, and one that can be used at home, a remedy which is sold by druggists under the name of "positive guarantee" and, if taken in time and given a fair trial, it will effect a cure, or money paid for it will be promptly returned. We refer to the world-famous cure for consumption (or lung-scrophulous) known as Dr. Pierce's Golden Medical Discovery. It is the only remedy for this terrible disease possessed of such superior curative properties as to warrant its manufacturers in selling it under a guarantee.

Don't hawk, and blow, and spit, but use Dr. Sage's Catarrh Remedy. O. Druggists.

**Loose's Red Clover Pill Remedy.**

Is a positive specific for all forms of the disease. Blind, bleeding, itching, ulcerated and protruding piles. Price 50c. For sale by Logan Drug Store, Corner Druggists, Wheeling, W. Va. DAW

**Convincing Proof.**

In many instances it has been proved that B. B. B. (Bottle and Label) made by Blood Balm Co., Atlanta, Ga., will cure blood poison in its worst stages, even when all other treatment fails.

A. P. Brunson, Atlanta, Ga., writes: "I had 24 running ulcers on one leg and 6 on the other, and for nearly a year I had been unable to walk. I was finally cured by the use of Blood Balm. I had taken a barrel of medicine, in vain, before I found the cure. With little hope I finally acted on the urgent advice of a friend, and got a bottle of B. B. B. I experienced a change, and my dependency was somewhat dispelled. I was using it until I felt better, and then I used it all the time, and the ulcers, rheumatism and all other horrors of blood poison have disappeared, and at last I am sound and well again, after an experience of twenty years of torture."

Robert Ward, Mass., Ga., writes: "My disease was pronounced a tertiary form of blood poison. My feet and ankles were a mass of corruption, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured. My disease was cured, and finally the disease began eating my skin bones. My bones ached; my kidneys were diseased; I lost flesh and strength, and life became a burden. All said I must surely die, but nevertheless, I had used ten bottles of B. B. B. I was pronounced cured.
